MA Department of Elementary and Secondary Education- Positive Cases in Schools- Weekly Report

<http://www.doe.mass.edu/covid19/positive-cases/#weekly-report>

Sudbury Health Department Weekly COVID-19 Report as of Sept. 30, 2020

The Sudbury Health Department is actively monitoring the status of the COVID-19 pandemic among Sudbury residents. The reporting structure below is designed to balance the privacy of affected residents, while keeping the public informed about COVID-19 activity among Sudbury residents on a weekly basis. The frequency and format are subject to change. It is important to understand that these numbers DO NOT include positive cases among non-residents, who work in Sudbury ONLY THOSE who LIVE IN SUDBURY.

Table 1. Distribution of confirmed and clinically diagnosed cases in Sudbury

COVID-19 Diagnosis	Total Cases	New Cases	Active cases	Recovered/off quarantine
Confirmed* COVID-19	222	2	2	183
Probable** COVID-19	42	0	0	39
Contacts***	169	4	11	158

*Confirmed cases are individuals who had a positive PCR lab test.

**Probable cases are individuals, who had positive antibody/antigen testing and/or were clinically diagnosed with COVID-19 because of symptoms and confirmation of close contact with COVID-19, but were not lab tested. Probable cases may also include individuals whose death certificate listed COVID-19 as a cause of death, who were not lab tested.

***Contacts are people who were exposed to a positive case and were quarantined (exposed but no illness).

*** Numbers change daily for multiple reasons including classification change, transfers to other communities and states based on official residence.

Table 2. Distribution of COVID-19 investigated cases with Sudbury address who were transferred elsewhere and non-residents who are quarantining in Sudbury.

COVID-19 Cases	Total Cases	New Cases
Cases Transferred Out of Sudbury*	13	10
Non-Residents being Monitored in Sudbury**	11	9

*Cases with Sudbury address investigated or identified as a contact then transferred to other communities or states for monitoring

**Cases (e.g. college students) with addresses at other locations but isolating and quarantining in Sudbury Number tracking started 9/23/2020

Table 3. COVID-19 cases in the community versus long term care facilities

Sudbury Community Cases	76
Long Term Care Confirmed Cases	146

Please Note: These estimates are based upon data reported by the Massachusetts Department of Public Health (MDPH) and change frequently. This report reflects the data available to the Sudbury Health Department on a weekly basis, ending each Wednesday at 12 midnight. Classification of the Events can change based on testing. An example of this would be if an individual identified as a contact became symptomatic and then tested positive, this would change their classification to a confirmed case.

Table 1. Distribution of confirmed and clinically diagnosed cases in Sudbury

COVID-19 Diagnosis	Total Cases	New Cases	Active cases	Recovered/off quarantine
Confirmed* COVID-19	210	2	6	169
Probable** COVID-19	36	6	0	33
Contacts***	125	3	7	118

*Confirmed cases are individuals who had a positive lab test.

**Probable cases are individuals, who had positive antibody testing and/or were clinically diagnosed with COVID-19 because of symptoms and confirmation of close contact with COVID-19, but were not lab tested. Probable cases may also include individuals whose death certificate listed COVID-19 as a cause of death, who were not lab tested.

***Contacts are people who were exposed to a positive case and were quarantined (exposed but no illness).
