#### Sudbury Health Department Weekly COVID-19 Report as of Sept. 30, 2020

The Sudbury Health Department is actively monitoring the status of the COVID-19 pandemic among Sudbury residents. The reporting structure below is designed to balance the privacy of affected residents, while keeping the public informed about COVID-19 activity among Sudbury residents on a weekly basis. The frequency and format are subject to change. It is important to understand that these numbers DO NOT include positive cases among non-residents, who work in Sudbury ONLY THOSE who LIVE IN SUDBURY.

Table 1. Distribution of confirmed and clinically diagnosed cases in Sudbury						
COVID-19 Diagnosis	<b>Total Cases</b>	New Cases	Active cases	Recovered/off quarantine		
Confirmed* COVID-19	222	2	2	183		
Probable** COVID-19	42	0	0	39		
Contacts***	169	4	11	158		

\*Confirmed cases are individuals who had a positive PCR lab test.

\*\*Probable cases are individuals, who had positive antibody/antigen testing and/or were clinically diagnosed with COVID-19 because of symptoms and confirmation of close contact with COVID-19, but were not lab tested. Probable cases may also include individuals whose death certificate listed COVID-19 as a cause of death, who were not lab tested.

\*\*\*Contacts are people who were exposed to a positive case and were quarantined (exposed but no illness).

\*\*\* Numbers change daily for multiple reasons including classification change, transfers to other communities and states based on official residence.

Table 2. Distribution of COVID-19 investigated cases with Sudbury address who were transferred elsewhere and non-residents who are quarantining in Sudbury.					
COVID-19 Cases Total Cases New Cases					
Cases Transferred Out of Sudbury*	13	10			
Non-Residents being Monitored in Sudbury** 11 9					

\*Cases with Sudbury address investigated or identified as a contact then transferred to other communities or states for monitoring

\*\*Cases (e.g. college students) with addresses at other locations but isolating and quarantining in Sudbury Number tracking started 9/23/2020

Board of Health

## Sudbury Health Dept. Weekly COVID-19 Report as of July 6, 2020

The Sudbury Health Department is actively monitoring the status of the COVID-19 pandemic among Sudbury residents. The reporting structure below is designed to balance the privacy of affected residents, while keeping the public informed about COVID-19 activity among Sudbury residents on a weekly basis. The frequency and format are subject to change. It is important to understand that these numbers DO NOT include positive cases among non-residents, who work in Sudbury ONLY THOSE who LIVE IN SUDBURY.

Table 1. Distribution of confirmed and clinically diagnosed cases in Sudbury				
COVID-19 Diagnosis	Total Cases	New Cases	Active cases	Recovered/off quarantine
Confirmed* COVID-19	197	1	6	158
Probable** COVID-19	19	1	0	17
Contacts***	104	3	1	103

\*Confirmed cases are individuals who had a positive lab test.

\*\*Probable cases are individuals, who had positive antibody testing and/or were clinically diagnosed with COVID-19 because of symptoms and confirmation of close contact with COVID-19, but were not lab tested. Probable cases may also include individuals whose death certificate listed COVID-19 as a cause of death, who were not lab tested.

\*\*\*Contacts are people who were exposed to a positive case and were quarantined (exposed but no illness).

#### Table 2. COVID-19 cases in the community versus long term care facilities

Sudbury Community Cases	53
Long Term Care Confirmed Cases	144

Table 3. COVID-19 cases by gender and age		
Female	121	
Male	76	
0-20	2	
20-40	17	
40-60	30	
60-80	66	
>80	82
