### Sudbury Health Department Weekly COVID-19 Report as of Sept. 30, 2020

The Sudbury Health Department is actively monitoring the status of the COVID-19 pandemic among Sudbury residents. The reporting structure below is designed to balance the privacy of affected residents, while keeping the public informed about COVID-19 activity among Sudbury residents on a weekly basis. The frequency and format are subject to change. It is important to understand that these numbers DO NOT include positive cases among non-residents, who work in Sudbury ONLY THOSE who LIVE IN SUDBURY.

**Table 1. Distribution of confirmed and clinically diagnosed cases in Sudbury**

COVID-19 Diagnosis	Total Cases	New Cases	Active cases	Recovered/off quarantine
Confirmed* COVID-19	222	2	2	183
Probable** COVID-19	42	0	0	39
Contacts***	169	4	11	158

\*Confirmed cases are individuals who had a positive PCR lab test.

\*\*Probable cases are individuals, who had positive antibody/antigen testing and/or were clinically diagnosed with COVID-19 because of symptoms and confirmation of close contact with COVID-19, but were not lab tested. Probable cases may also include individuals whose death certificate listed COVID-19 as a cause of death, who were not lab tested.

\*\*\*Contacts are people who were exposed to a positive case and were quarantined (exposed but no illness).

\*\*\* Numbers change daily for multiple reasons including classification change, transfers to other communities and states based on official residence.

**Table 2. Distribution of COVID-19 investigated cases with Sudbury address who were transferred elsewhere and non-residents who are quarantining in Sudbury.**

COVID-19 Cases	Total Cases	New Cases
Cases Transferred Out of Sudbury*	13	10
Non-Residents being Monitored in Sudbury**	11	9

\*Cases with Sudbury address investigated or identified as a contact then transferred to other communities or states for monitoring

\*\*Cases (e.g. college students) with addresses at other locations but isolating and quarantining in Sudbury Number tracking started 9/23/2020

**Table 3. COVID-19 cases in the community versus long term care facilities**

Sudbury Community Cases	<b>76</b>
Long Term Care Confirmed Cases	<b>146</b>

*Please Note:* These estimates are based upon data reported by the Massachusetts Department of Public Health (MDPH) and change frequently. This report reflects the data available to the Sudbury Health Department on a weekly basis, ending each Wednesday at 12 midnight. Classification of the Events can change based on testing. An example of this would be if an individual identified as a contact became symptomatic and then tested positive, this would change their classification to a confirmed case.

### Sudbury Health Dept. Weekly COVID-19 Report as of August 26, 2020

The Sudbury Health Department is actively monitoring the status of the COVID-19 pandemic among Sudbury residents. The reporting structure below is designed to balance the privacy of affected residents, while keeping the public informed about COVID-19 activity among Sudbury residents on a weekly basis. The frequency and format are subject to change. It is important to understand that these numbers DO NOT include positive cases among non-residents, who work in Sudbury ONLY THOSE who LIVE IN SUDBURY.

**Table 1. Distribution of confirmed and clinically diagnosed cases in Sudbury**

COVID-19 Diagnosis	Total Cases	New Cases	Active cases	Recovered/off quarantine
Confirmed* COVID-19	213	3	3	175
Probable** COVID-19	39	3	0	36
Contacts***	136	12	8	128

\*Confirmed cases are individuals who had a positive lab test.

\*\*Probable cases are individuals, who had positive antibody/antigen testing and/or were clinically diagnosed with COVID-19 because of symptoms and confirmation of close contact with COVID-19, but were not lab tested. Probable cases may also include individuals whose death certificate listed COVID-19 as a cause of death, who were not lab tested.

\*\*\*Contacts are people who were exposed to a positive case and were quarantined (exposed but no illness).
