February 14, 2023

Greetings,

Below is a copy of a legal notice describing planned aerial applications to control mosquito larvae that appeared in the Boston Globe on February 9, 2023. Publishing the legal notice and sending a copy to the appropriate Board of Health are requirements of the notification criteria of Massachusetts Pesticide Board regulation 333 CMR: 13.04(7).

The purpose of the regulation is to facilitate public notification prior to aerial applications of mosquito larvicides. The February 9, 2023 legal notice will be the only legal notice published this year for aerial application notification purposes. Press releases will be issued prior to any aerial larvicide applications over wetlands.

If you have questions concerning aerial applications, the legal notice or the regulations, let me know.

Kind Regards,

Brian Farless
Superintendent

Legal notice published on February 9, 2023

During 2023, East Middlesex Mosquito Control Project will be conducting helicopter applications to control mosquito larvae. Potential applications will be conducted at any time between April 1 and October 31 and will be over specific large wetlands in Bedford, Belmont, Burlington, Framingham, Lexington, Maynard, Medford, Melrose, North Reading, Reading, Sudbury, Wakefield, Waltham, Wayland, Wellesley, Weston and Winchester. Trade names of the potential products utilized will be any of the following: VectoBac GR (EPA Reg. #73049-486); VectoBac GS (EPA Reg. #73049-10). For further information, contact us at 781-899-5730.
