Kay Westcott, 5 Richard Road, Wayland and member of Wayland Historical Commission, asked if the glue used on the glulam wood be affected by water. Mr. Andreas replied in the negative. Ms. Westcott asked if the guardrails would block access to the river. Ms. Rivard replied that she would check with the design team and report back to the commission regarding such access.

Mr. Hagger summarized several project-related questions/requests, such as: submitting architectural renderings/drawings, providing information on coloration changes due to time/weathering of glulam and other various wood materials being used, location of a plaque or kiosk, adjusting the guard rail on the north side of the bridge using 3 rails instead of the 4 rails proposed, reducing the large 14 “ gap at the bottom of the south side railing, using a wood wearing surface atop the glulam decking sections, boxing the metal rails with wood, and consideration of using steel-backed timber rails for the transition railing area on the south side.
