

Fairbank Therapeutic Garden Program

We are happy to announce that the Fairbank Therapeutic Garden Program is officially up and running! We have four raised beds located outside our facility and they are flourishing with flowers and herbs! These beds are fully accessible allowing community members to cultivate not only flowers, and herbs, but also a strong sense of community. Come try out some of our horticulture classes this fall!

HORTICULTURE CREATIONS

Join us for this sensory rich program in which participants will create textural and tasty seasonal projects from scratch using herbs and other garden grown materials. Participants will be creating projects using plants chosen to emphasize a variety of colors, tastes, scents, textures and sounds to achieve as meaningful a sensory experience as possible!

Parents do not need to participate but are asked to remain on site.

Oct. 30: Halloween Horticulture- Participants will use pumpkins, flowers, seeds, & other natural materials to create beautiful pumpkin creations for your home!

Nov. 20 Culinary Horticulture- Using dried herbs, participants will create their own mulled cider spice mix & a hearty herb mixture for Thanksgiving stuffing!

DAY: Tuesday

TIME: 5:00-6:00PM

AGES: 12-adult

COST: \$60

WHERE: FCC Room 1
