There was no public comment.

Brooks Mostue presented the proposed RFQ and explained that the OPM would be initially retained on an hourly basis to obtain a second opinion on how to proceed with respect to addressing the condition of the roof, and then there would be a negotiated contract to proceed with obtaining a designer and contractor.

There was also a recommendation to add a site walk to the RFQ.

There was also a recommendation to have the OPM consult with an energy audit company to determine if full replacement would be a possible recommendation after a cost benefit analysis to determine the long term economic benefit of full replacement.

The building committee voted to recommend to the school committee that the school committee approve the expedited issuance of an RFQ subject to review and approval by counsel for the regional district. The motion passed unanimously.

The meeting adjourned around 6:00 pm
