# Park and Recreation Enterprise Funds and Rates 

PUBLIC HEARING

MARCH 18, 2019

## What is an enterprise fund budget?

An enterprise fund gives communities the flexibility to account separately for all financial activities associated with a broad range of municipal services. It establishes a separate accounting and financial reporting mechanism for municipal services for which a fee is charged in exchange for goods or services.

Revenues and expenses of the service are segregated into a fund with financial statements separate from all other governmental activities.

## Notes about enterprise funds

These budgets should be self-sufficient. They should not carry deficits.
They should include direct costs, indirect costs, and capital costs.
Note: Deficits will need to be carried by the tax levy.
Note: Any budget surplus goes into retained earnings

- Retained earnings are best used for capital, but may be used for operating expenses.

## Sudbury enterprise funds

Sudbury has two enterprise funds related to Parks and Recreation

- Pool Enterprise
- Field Maintenance Enterprise

## Notes about Pool budget

Budget is decreasing from last year

- No longer a funding source for the director's salary
- Attrition

Rate increase (6\%) was voted after July 1 so revenues are not where they were projected.

- Lost two months of increased revenues

## Pool revenues historically

## Proposed Pool Rates

Based on rate study and the historical information regarding pool revenues, we are recommending a $10 \%$ increase (rounded up to nearest dollar) to the pool rates effective July 1, 2019.

We are projecting that there will be no fund balance left at the end of this fiscal year.
If we do not raise the rates to meet the budget and create some capacity in the fund balance, then we will need to reduce the hours at the pool mid-year in order to decrease the budget further.

Since there is no fund balance, available the pool can not go into a deficit.
Classes would increase $10 \%$ and be rounded up to the nearest dollar.

## Proposed pool rates contd.

An additional issue: inequity in rates

Family rate and couple rate currently too low and should be further reevaluated to bring equity with other rates.

Currently couple rate and family rate equal less than two youths per month.
Two youths is $\$ 74$
A couple is $\$ 66$ and a family is $\$ 72$.
This should be addressed.
