

18:29:20 From Howard Feng to All panelists : This is Howard from FinCom
19:12:41 From Craig Berkel to All panelists : Craig Berkel - Sudbury
Youth Football & Cheer - Our enrollment has increased by %165
19:13:15 From Mike Whidden (Charles River RC) to All panelists : Raised
hand in error. Sorry.
19:14:03 From Tracy Berry : Sudbury Womens Softball has been fairly
consistent for the last 7-10 years in their numbers.
19:14:10 From Mike Whidden (Charles River RC) : Charles River RC has not
seen any notable change in attendance at the field in the past several years.
19:16:27 From Craig Berkel to All panelists : Sudbury Youth Football &
Cheer
19:17:33 From Art Reilly Lincoln-Sudbury : LS Athletics is staying fairly
consistent. Slight decline in enrollment projected but athletic field needs will
remain about the same.
19:18:10 From JT Frissora to All panelists : LS Youth Lacrosse - We have
pretty consistent numbers and have not had issues finding field space
19:18:45 From Craig Berkel to All panelists : Yes, future lights on
various fields.
19:19:01 From Geoff Howell : Sudbury Mens Softball has been consistent for
#s for the last five years. Our greatest need is for secondary field space to
accommodate make-up games and additional games during week.
19:19:05 From Charles River Radio Controllers David Spielman to All
panelists : Charles river radio control prefers to have a flat field without
obstruction, so permanent structures are not preferred
19:19:15 From Terry Rushfirth to All panelists : I'm Terry Rushfirth. I
represent the 0.63 men's soccer team. We have been playing for several years and
need only 1 soccer field. Our usage needs remain at that level. Unfortunately
because of Covid we were unable to field a team in the Fall and expect that to be
the case in the Spring We hope to resume in the Fall 2021 season.
19:19:41 From Kate to All panelists : SGS (Girls Softball) has remained
steady for the last several years and 2020 was supposed to be our highest enrollment
year (~300 girls over 3 seasons - Spring/Summer/Fall). We use Feeley 6 nights a week
in spring and summer and would use 7 nights, but we share field with Women's
Softball. Girls are staying with SGS longer and when they play for Curtis, they
still enjoy playing town softball.
19:20:50 From Marc Spector (Sudbury Youth Baseball) to All panelists :
Sudbury Baseball has been consistent over the past 5 years. We use school fields
and featherland, feeley and Haskell and our focus has been on maintenance at
Haskell, Feeley and Featherland. Broadacres provides and opportunity at featherland
to move from the school fields to our entire program and featherland.
19:22:33 From Kate to All panelists : As previously shared with P & R
commission, there are many challenges with the Feeley Softball fields (e.g.
drainage, slopes, no dividers between Upper Feeley and Tennis Courts posing safety
issues). We are eager to start making those improvements. A real wish list item
would be to have lights for night games, but we know that is a significant expense,
so safety has been our priority requests up to this point.
19:24:15 From Mike Whidden (Charles River RC) : For CCRC, the current field
state at Davis has been adequate (excepting a few slight drainage issues at the back
of the field) and we appreciate being able to enjoy the field. Having an equipment
shed of some sort at Davis would be very useful.

19:27:35 From Charles River Radio Controllers David Spielman to All panelists : We at CRRC is Happy as is. Drainage has little affect on our use.

19:27:46 From Tracy Berry : i have my hand raised

19:29:48 From Craig Berkel to All panelists : Would there be interest from the various Youth Programs (soccer, football, Lax) to make a contribution to a set of lights at LS Turf 1 & 2 along with the HS?

19:32:10 From Art Reilly Lincoln-Sudbury : I don't believe you can hear me.

19:33:04 From Mike Whidden (Charles River RC) : Art, we can hear you.

19:37:33 From Charles River Radio Controllers David Spielman to All panelists : Certain types of structures on Davis Field will make it difficult to fly model airplanes. Positioning of structures on the field to maximize open space, especially longer open runs helps to accommodate Charles River Radio Controller users.

19:41:37 From Charles River Radio Controllers David Spielman to All panelists : We have seen very quick response to repairing ruts in the turf at Davis Field. Davis Field mowing has been excellent.

19:42:09 From Robert Lee Youth Soccer to All panelists : Just a thank you for taking care of our fields need

19:58:52 From Craig Berkel to All panelists : I would like to comment on the lights

20:02:08 From Sandy Moore to All panelists : Sudbury Soccer does the same regarding the Community Field as football. User fee plus lights/hour

20:29:14 From Mike Whidden (Charles River RC) : Thank you, panelists, for having us.

20:29:34 From Sandy Moore to All panelists : Thanks Commission!!

20:31:52 From Art Reilly Lincoln-Sudbury : Thank you for hosting this and getting this information out to everyone. I appreciate all that the Park & Recreation Board does as well as Dennis and his staff.
