Sudbury to Hudson Transmission Reliability Project

You are invited to join us as we share information about a proposed transmission system upgrade, the Sudbury to Hudson Transmission Reliability Project, at an Open House for local residents. This proposed project will strengthen our system and ensure customers have reliable power to meet their energy needs.

The new 8.9-mile transmission line would be constructed between Eversource's substation in Sudbury, Mass., and the Hudson Light and Power substation in Hudson, passing through portions of Sudbury, Marlborough, Stow, and Hudson.

Please come to one of our regional **Open Houses**, where you'll learn what this project will mean for northeastern Massachusetts. Project Team members will be available to provide information and answer your questions.

Tuesday
March 15, 2016

Drop in between
5 - 7 p.m. Hudson Town Hall Auditorium
78 Main Street
Hudson, MA 01749

Wednesday
March 16, 2016

Drop in between
5 - 7 p.m. Sudbury Town Hall
322 Concord Road
Sudbury, MA 01776
