

This summer, we are improving safety, connectivity, and flow of people walking, biking, and driving on this critical local and regional connection:

- Two vehicular travel lanes to Boston and to Cambridge
- Dedicated left turn lane to Land Boulevard and the Museum of Science
- Flex-post separated bike lanes with bike signals
- Enhanced pavement markings, signage, and signal timings

Construction will occur overnight during the weeks of July 21 and July 28 and lane closures will be clear by 5 a.m.
