Eversource 115-kV Project Update

Greetings!

Members of the community can expect to see construction at several sites in Sudbury, Stow, and Hudson related to the Eversource 115-kilovolt (kV) Underground Transmission Line Project. Eversource asks people to avoid walking on the inactive Massachusetts Bay Transportation Authority (MBTA) rail corridor.

Crews are focused on placing cable vaults (also called manholes or MH for short) and installing duct bank. In both cases the operation begins with excavation, installing the cable vault or duct bank, and backfilling trenches. Crews typically work between recently placed cables vaults to install duct bank, for example, between MH12 and MH13 in Hudson.

Work Hours

Approved work hours are 7 a.m. to 6 p.m., Monday to Friday but crews are working from **7 a.m. to 3:30 p.m.** Occasional work may extend beyond the approved hours, due to unforeseen circumstances, based on approval from local officials. **There will be no work**

on July 3rd and July 4th. From July 5th to July 7th, crews will be working from 7 a.m. to 5 p.m.

Below is an overview of the active work zones. [View the project map](#) for additional details on the location of work crews.

Hudson

- **On Forest Avenue, west of Marlboro Street**, crews are excavating and install duct bank in the road between a recently installed cable vault (MH2) and Marlboro Street.
- **On Wilkins Street**, crews are excavating and installing duct bank, between Main Street and the Assabet River Trail Head.
- **In the corridor between Wilkins Street and Bridge 130**, crews are excavating and installing duct bank between MH6 and MH5 (north of Orchard Drive).
- **In the corridor from Parmenter Road to White Pond Road**, crews are working to complete final grading.
- **On Chestnut Street, north of Lewis Street**, crews are working to complete a section of duct bank between two manholes, that have been installed on either side of the Chestnut Street bridge. Chestnut Street will be excavated on either side of the bridge with a portion of the road being removed entirely. ***For this work, this portion of Chestnut Street will be closed for an extended period, lasting up to four months.*** Chestnut Street will be closed to through traffic and only be open to local access up to the MBTA crossing at Chestnut Street/Marlboro Road.

Sudbury

- **Between Bridge 128 and Dutton Road**, crews will begin installing a cable vault (MH17) starting next week.
- **From Dutton Road to Peakham Road**, crews are grading the limits of work in several areas. Starting on July 5, the installation of a cable vault (MH18) will begin in this area.
- **Between Peakham Road and Horse Pond Road**, crews are installing a cable vault (MH20) east of Peakham Road, south of Whispering Pine Road.
- **Between Horse Pond Road and Union Avenue**, two crews are excavating and installing duct bank between two recently installed cable vaults (MH21-MH23) south of Bridle Path and Stonebrook Road.
- **Upgrades are continuing at the Sudbury Substation** inside the fence and on Eversource property.

**Due to the complexities of underground construction, the two-week schedule described above is subject to change.*

Typical Construction

Pictured is a crew in Hudson working on final grading activities in the inactive MBTA corridor.

Stay Informed

Eversource is committed to being a good neighbor and doing any work with respect for you and your property. If you have questions, please contact us directly or click on one of the resources below.
