Eversource 115-kV Project Update

Greetings!

Over the next week, you can expect to see construction activity at work sites in Sudbury and Hudson (in the inactive MBTA corridor) related to the Eversource 115-kilovolt (kV) Underground Transmission Line Project. Drivers and pedestrians are asked to be mindful of signage and the direction of police details.

Work Hours

Approved work hours are 7 a.m. to 6 p.m., **Monday to Friday** but crews are working from **7 a.m. to 4 p.m.** in most areas. Occasional work may extend beyond the approved hours, due to unforeseen circumstances, based on approval from local officials.

Crews work between manholes (MHs) that have been placed along the project route. For a closer look, [view the project map](#).

Hudson

- **At Bridge 130, between Chestnut and Main Street**, one crew is working on abutment excavation and installing walers (beams). From there, they will install structural beams at the bridge.

Sudbury

- **From Peakham Road to Horse Pond Road**, crews are installing duct bank from MH19 to MH20. From there, they will install duct bank from MH20 to MH21.
- **At Bridge 128 between the Town Line and Dutton Road**, crews will be working on the bridge rebuild over the next several weeks.
- **Between Horse Pond Road and Union Ave**, crews are working on final grading and gravel installation over the next few weeks.
- **Between Union Ave and Boston Post Road**, crews are working to install duct bank.
- **From Bridge 127 to the Sudbury Substation**, crews are installing duct bank between MH26 and MH27.
- **At the Sudbury Substation**, crews are conducting underground surveys ahead of duct bank installation between the Substation and MH28.

**Due to the complexities of underground construction and weather, the two-week schedule described above is subject to change.*
