## Eversource 115-kV Project Update

Greetings!

The following is an update related to the Eversource 115-kilovolt (kV) Underground Transmission Project in Sudbury and Hudson.

### Work Hours

Approved work hours are 7 a.m. to 6 p.m., **Monday to Friday** but crews are working from **7 a.m. to 4 p.m.** in most areas. Occasional activities may extend beyond the approved hours, due to unforeseen circumstances, based on approval from local officials. Crews work between manholes (MHs) placed along the project route. For a closer look, [view the project map](#).

### Hudson

- At Bridge 130, crews will soon begin installing crane mats and the bridge span will be installed in several weeks.

- Crews will return to manhole locations to begin installing the transmission cable by way of cable pulling and splicing later this year. Cable pulling is the process of installing the new transmission cable from one manhole to the next and splicing is the process of binding two sections of transmission cable together, after several cable sections have been installed. Property owners near these activities will receive additional notifications and can expect to see crews intermittently at manhole locations during the cable installation process.
- Road work in the Hudson streets, on Forest Avenue, will resume in the Spring, between MH2 and MH1 at Hudson Light and Power based on final approval from local officials in Hudson.

### Sudbury

- At Bridge 128, between the Town Line and Dutton Road, crews are continuing to work on the bridge rebuild.
- Between Dutton Road and Peakham Road, crews are working on the final grading process, south of Austin Road.
- At Bridge 127, crews are forming backwalls and installing concrete slabs. Crews will also be delivering and installing the bridge span.
- Between Bridge 127 and the Sudbury Substation, crews will begin installing several hand holes, which provide access to underground fiber optic cables, next week.
- Crews have begun accessing manhole locations underground in Sudbury throughout the MBTA corridor to proof the recently installed transmission conduit. This process takes several hours and is in advance of the cable installation which will begin later this year. Property owners near these activities will receive additional notifications and can expect to see crews intermittently at manhole locations.

*\*Due to the complexities of underground construction and weather, the two-week schedule described above is subject to change.*
