

Did you have any difficulties implementing this grant? If yes, please describe

The main challenge our area faces is WAV service. We investigated nearly half a dozen agencies that provide these, but they won't set up a service unless there is demonstrated and sufficient demand. We need you/MAPC to help us, perhaps by sending an RFP for MAGIC area services??

Other than this insufficiency, we have had no difficulties implementing the actual services.

Can you suggest ways to improve this grant program?

As above, we need help with a regional approach to WAV services. It is difficult to provide enough demand to companies from one or a few towns; however, it may be possible for a regional population to meet that requirement. We would so appreciate MAPC help in this!

Do you have any other comments to share?

Just deep appreciation from our residents for this help--with the pandemic and a totally car-dependent town, Tommy's and JFK have provided invaluable assistance.
